CORE SKILLS

- LiDAR Data Processing
- Point Cloud Classification
- DTM / DSM Production
- TerraScan & TerraModeler
- MicroStation
- ArcGIS / QGIS
- Python Automation
- Powerline Mapping
- Cadastral Mapping
- QA / QC
- WebGIS

SOFTWARE

TerraScan • TerraModeler • TerraMatch
MicroStation • ArcGIS • QGIS
Global Mapper • AutoCAD
Agisoft Metashape
Adobe Photoshop • Illustrator
Python • HTML • CSS • JavaScript

EDUCATION

MCA

Amity University | 2023–2025

BA

Berhampur University | 2016–2019

SANGRAM KUMAR NAHAK

SENIOR LiDAR DATA PROCESSING SPECIALIST | GIS CONSULTANT

PROFESSIONAL PROFILE

Results-driven LiDAR and Geospatial Specialist with 5.9+ years of experience in end-to-end LiDAR processing, point-cloud classification, macro automation, DTM/DSM production, GIS analysis and QA/QC. Experienced in airborne and drone LiDAR, powerline corridor analysis, cadastral mapping, infrastructure surveys and international projects. Strong hands-on expertise in TerraScan, MicroStation, ArcGIS, QGIS, Global Mapper and Python automation.

PROFESSIONAL EXPERIENCE

Geographic Information Systems Consultant | Geokno India Private Limited (A GMR Group Company)

Nov 2025 – Present

- Technical lead for international LiDAR and GIS projects.
- Integrated ArcGIS, QGIS, AutoCAD, Global Mapper and Metashape workflows.
- Drove QA/QC standards and high-accuracy deliverables.

Geographic Information Systems Engineer | ATOMGEO Private Limited

Sep 2025 – Nov 2025

- Final QA/QC filter for LiDAR and GIS vector data.
- Resolved geometry, attribute and projection discrepancies.

GIS Engineer / Senior Technician | Nakshatech Pvt Ltd | India & Qatar

Aug 2023 – Sep 2025

- Completed 9-month Qatar deployment.
- Developed Python scripts for LiDAR batch processing.
- Mentored staff on ortho-rectification and photogrammetry.

LiDAR Team Leader | Spectra Engineering Services Ltd.

Mar 2022 – Aug 2023

- Led airborne and drone LiDAR processing, classification and DTM/DSM extraction.
- Managed vendor deliveries and point-cloud audits.

LiDAR Engineer | GEODESY MAPPING SOLUTIONS PRIVATE LIMITED

Sep 2021 – Mar 2022

- Performed flight-line matching, filtering and surface auditing for UK infrastructure LiDAR.
- Integrated 3D outputs with ArcGIS and Global Mapper.

LiDAR Engineer (Trainee) | Nakshatech Pvt Ltd

Oct 2020 – Sep 2021

- Performed calibration, trajectory correction and noise filtration.
- Processed airborne and drone LiDAR datasets for DTM/DSM generation.

SELECTED PROJECT EXPERIENCE

Powerline Corridor & Vegetation Danger Zone Analysis

TerraScan macro automation, point-cloud classification, vegetation clearance analysis, MicroStation vectorization and GIS atlas delivery.

Survey of India – GIS Cadastral & Property Mapping

Parcel topology, property splitting, UPID assignment, ownership/attribute integration and rigorous GIS QA/QC.

Advanced LiDAR Project – Qatar

3D point-cloud classification, feature extraction, Python automation and conversion of LiDAR workflows into WebGIS platforms.

TECHNICAL EXPERTISE

LiDAR: Point-cloud pre-processing, classification, trajectory correction, flight-line matching, powerline mapping. Elevation: DTM, DSM, GCP alignment, ortho-rectification. GIS: ArcGIS, QGIS, Global Mapper, cadastral topology. Automation: Python, HTML, CSS, JavaScript.
